### **Rate Information**

The Interest Rate on your account is **2.48%** with an Annual Percentage Yield of **2.50%** that will be paid until the maturity date of this account.

Your account will mature on \_\_\_\_\_. The Annual Percentage Yield assumes that interest will remain on deposit until maturity. A withdrawal of interest will reduce earnings. Interest begins to accrue on the business day you deposit non-cash items (for example, checks).

### **Balance Computation Method**

We use the Daily Balance Method to calculate the interest on your account. This method applies a daily periodic rate to the Balance in your account each day.

### **Compounding and Crediting**

Interest will be accrued daily, compounded and credited monthly to your account from your account's issue date and at maturity.

### **Transaction Limitations**

### **Early Withdrawal Penalty**

If you're over 70 ½ and close the account before the Maturity Date, an Early Withdrawal Penalty equal to ninety (90) days of interest on the amount withdrawn may be charged to your account. The interest rate we will use to calculate the interest forfeiture will be the current interest rate on your account. Any Interest Earned will be paid at this time. The redemption value of your account may be less than the principal amount. Redemption value is calculated as follows: Principal plus Interest Earned minus Penalty Amount. We will honor a request for early withdrawal and we will not deduct any Early Withdrawal Penalty if the owner of the account dies or is judicially declared to be mentally incompetent during the existing term of this account. If you are under the age of 59 ½ and withdraw before the maturity date in addition to the early withdrawal penalty, IRS tax penalties may apply.
